The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

'LITTLE RHODY'S' GOOD WORK

Statement Made That Glory of Oliver Hazard Perry's Victory Belongs to That State.

The celebration of Perry's victory on Lake Erie recalls that the northwest was not only settled very largely by emigration from the New England states, but that those great and populous states were very probably saved to the union in the second war with England by the enterprise and valor of New England sailors, the Boston Herald observes.

Oliver Hazard Perry, then a commander in the navy and much discontented because the duties assigned to him offered no opportunity for proving his mettle, was a Rhode Islander in charge of a fleet of gunboats guarding Narragansett bay in the winter of 1812-13. Possessed, he said, "by an ardent desire to meet the enemies of his country," he applied for service on the lakes. On the very day that the order came for his transfer to Lake Erie he sent forward fifty men, the second day he sent fifty more, another party started on the long journey the following day, and Perry himself started on February 22, taking with him the boy of his famous painting, his brother, aged twelve years. The wilderness trip was a hard and tedious one, and the lake was reached on March 27. All the men who had been under his orders in Rhode Island had volunteered for the service, so attached to him were they.

There is good reason to consider the operations that followed on Lake Erie as part of the history of Rhode Island. The interruption of commerce by the war had thrown many captains, mates and seamen out of employment, and many of them had taken service with Perry on the Narragansett flotilla. Thus it came about that Rhode Island had in the battle of Lake Erie not only Perry himself, but four of the nine commanders, a majority of the sailing masters and mates, a large number of the remaining officers and a great many of the sailors, besides the men who superintended the rigging and arming of the fleet.

The centenary celebration, therefore, is a tribute to the prowess of a New England state. It was said years ago by a historian that there never was an expedition of importance to the country which was made up so largely of officers and men from a single state.

DISEASES CURED BY RESTING

For Active Tuberculosis Especially, Repose in Bed is Most Powerful Remedial Agent.

An eminent English scientist declares that in both the plant and animal kingdoms rest is essential to growth. In infancy development is in its highest state of activity, and the healthy infant passes the greatest portion of its life in a state of rest and sleep.

Repair is but the repetition of growth and for it rest is just as necessary as an injury to limbs when rest is obtained by splints, bandages, etc. In the case of the heart and lungs rest can be got only by resting the whole body in the recumbent position. Rest in bed is the most powerful curative agent in the treatment of active tuberculosis.

One or two months in bed, he says, are necessary in the beginning of treatment of all cases. If the disease is very active the patient should be fed by a nurse and treated as in typhoid fever. Bed treatment should be continued until the temperature and pulse have both been normal for some time and the weight is nearly normal. The rest treatment of tuberculosis has been attended with pleasing results.

Thick.
Attorney General McReynolds said of an unwise charity:

"Such a charity, sustaining the shiftless at the expense of the thrifty, reminds me of Farmer Brown's hired man, John."

"John's a good feller," said Farmer Brown, "but a bit thick—a bit thick."

"I'll tell you what John's like. I sent him out one morning to thin out the onion patch—it was a fine patch, but over-crowded. He worked a day or two on the job, and then I went to see what he'd been doing."

"Well, sir, I found that he'd pulled out all the biggest onions and heaved them away, leaving only the smallest, meanest plants in each row. I asked him what in tarnation he meant by such work, and he said he wanted to give the little fellers a chance—the big ones had crowded them out and they couldn't grow."

"Yes, John's a bit thick—a bit thick."

Of Bar Room Nationality.

Alderman John Koerner is rapidly coming forth as the real wit in the city hall, as those who have attended common council meetings will testify. During a discussion the other day, one of the aldermen demanded the nationality of one of the city officials.

"On his mother's side, the family is Scotch, so I suppose he's half Scotch," began Alderman E. A. Wittig. "As for the other half—"

"Seltzer, I suppose," finished up Alderman Koerner.—Milwaukee Wisconsin.

Quite the Contrary.

"Well, did Bibbles enjoy his fishing trip?"

"Yes. He says he had a corking good time."

"Umph! I know Bibbles. He means he had an uncorking good time."
